Subject: MN is ready - PLEASE RESPOND!

Good day Executive Board members,

Over the past few months you've heard our reports about continued organizing with new Craft-brewers similar to FAIR STATE Brewing where we have a Contract.

Now, with the MN Legislature in full swing we have language included for "NEUTRALITY" in legislation that would legalize Cannabis and THC/Hemp products for all Minnesotans. Craft-brewers like Fair State are making these canned products with many more brewers interested producing them. The legislation as written would require a Labor Peace Agreement with a Union if it passes.

We feel very strongly that we should be joining with other stakeholders in working together to pass this legislation. The coalition is called MN is Ready. The organization includes farmers, growers, processors, retailers, healthcare providers, decriminalization allies and unions like the UFCW who are already organizing workers around the country in this industry.

Today, by email the Officers are looking for your support to join this group leading the legislation along with us and the UFCW.

We are asking to join the "MN is Ready For Cannabis Legalization Coalition" at the cost of 8,000 dollars.

In Short, our strong belief is that joining this Coalition is imperative for us and could result in us receive labor peace agreements with upwards for 40 new employers throughout the state. This is obviously important for our continual growth and recovery. Please respond as soon as possible by voting YES or NO.

Mike,

We have been reporting in this legislation that we have been a part of for the past several board meetings. The reason for the urgency is that our legislation is moving through the house and senate fairly quickly and will soon be in committee. We need to make sure that we are a part of the coalition that is ensuring that the changes that happen during the committee session do not leave us completely out of the bill.

In short, we need to ensure that there is a labor voice on this coalition or we quite frankly will be on the chopping block when changes start to happen. We cannot simply assume that our language in this legislation is safe from being devastatingly altered or deleted all together.

And while I understand that this is a large amount of money, what is on the line is the ability to fairly quickly organize more than 800 new members, which will be one of the largest sectors of our local and is imperative to our continual growth.

Thanks

Christa
